FHB / FHH 10 Radio Base - Trouble Shooting Guide

Radio Base does not work Correctly

- Will not connect to other bases in Alarm Mode → Re-pair (Learn) to the all other radio bases. If all attempts fail – contact Fireblitz
- No Leds showing → The Leds flash very briefly every minute during use. During learning they flash 2-3 times per second
- Will not power up → Refer to the handbook and check that the power switch or header (in older versions) is on. If all attempts to turn it on fail – contact Fireblitz
- Will not learn correctly → ***Make sure the power is on in all devices. (The led on the side of the base should be flashing red or green during the process)
  *** Refer to the handbook and check that the "Learn Button" has been pressed on all devices to be connected to.
  *** If all attempts fail contact Fireblitz
