

Carbon Monoxide

Installation Guidance

Carbon Monoxide Alarms from Firehawk

CO7B

CO7BD

Carbon Monoxide Alarms – Installation

The overriding instruction is to ALWAYS follow the manufacturers guidance.

ALWAYS read the ENTIRE  Handbook and keep it in a safe place – where you can find it!!

ALWAYS make sure you understand the lights and sounds.

Green = Power

Red = Alarm

Test = All the Lights

Yellow = Low Battery

Yellow = Fault

Carbon Monoxide Alarms – Installation

General Guidance

The position of the alarm should be where it can detect CO as soon as possible to alert and protect the occupants of the premises. (Do not place closer than 1m from the source appliance)

That it can be heard by the occupants when in all parts of the premises including behind closed doors.

If either or both of these conditions cannot be met, additional alarms should be fitted throughout the premises

Carbon Monoxide Alarms – Installation

More General Guidance

- REMEMBER - The overriding instruction is to ALWAYS follow the manufacturers guidance.
- *Place the alarm in the room of potential origin of CO*
- *Place it high in the room (Above the tops of windows and doors) but no closer than 150mm from the ceiling.*
- *If the alarm is in another room and NOT the room of origin it should be placed within the breathing zone of occupants in the room.*
- *Be particularly aware of the elderly, disabled and children; and their limitations.*
- **TEST THE ALARM BEFORE LEAVING THE PREMISES**

Carbon Monoxide is hot when it is released so it will be carried upwards to the top of the room of origin from where it will cool and fall to all parts of the premises.

Carbon Monoxide Alarms – General End User instructions

- *REMEMBER - The overriding instruction is to ALWAYS follow the manufacturers guidance.*
- *Test the alarm once a week to ensure it is still operating*
- *Vacuum the alarm to keep the vents clear of dust and insects*
- *Every six months clean the alarm with a damp cloth (do not use spray or chemical cleaners and polishes)*
- *In the event of a problem, read the handbook and / or contact the manufacturer*
- *Replace the alarm at the end of its life.*
